ITAM and Army Training Management

LTC Joe Schweitzer

DPTM, Ft. Leonard Wood, MO

29 AUG ‘01

AGENDA

- Purpose
- “Training the Force”—doctrine
- Example
- FLW’s ITAM METL
- Summary

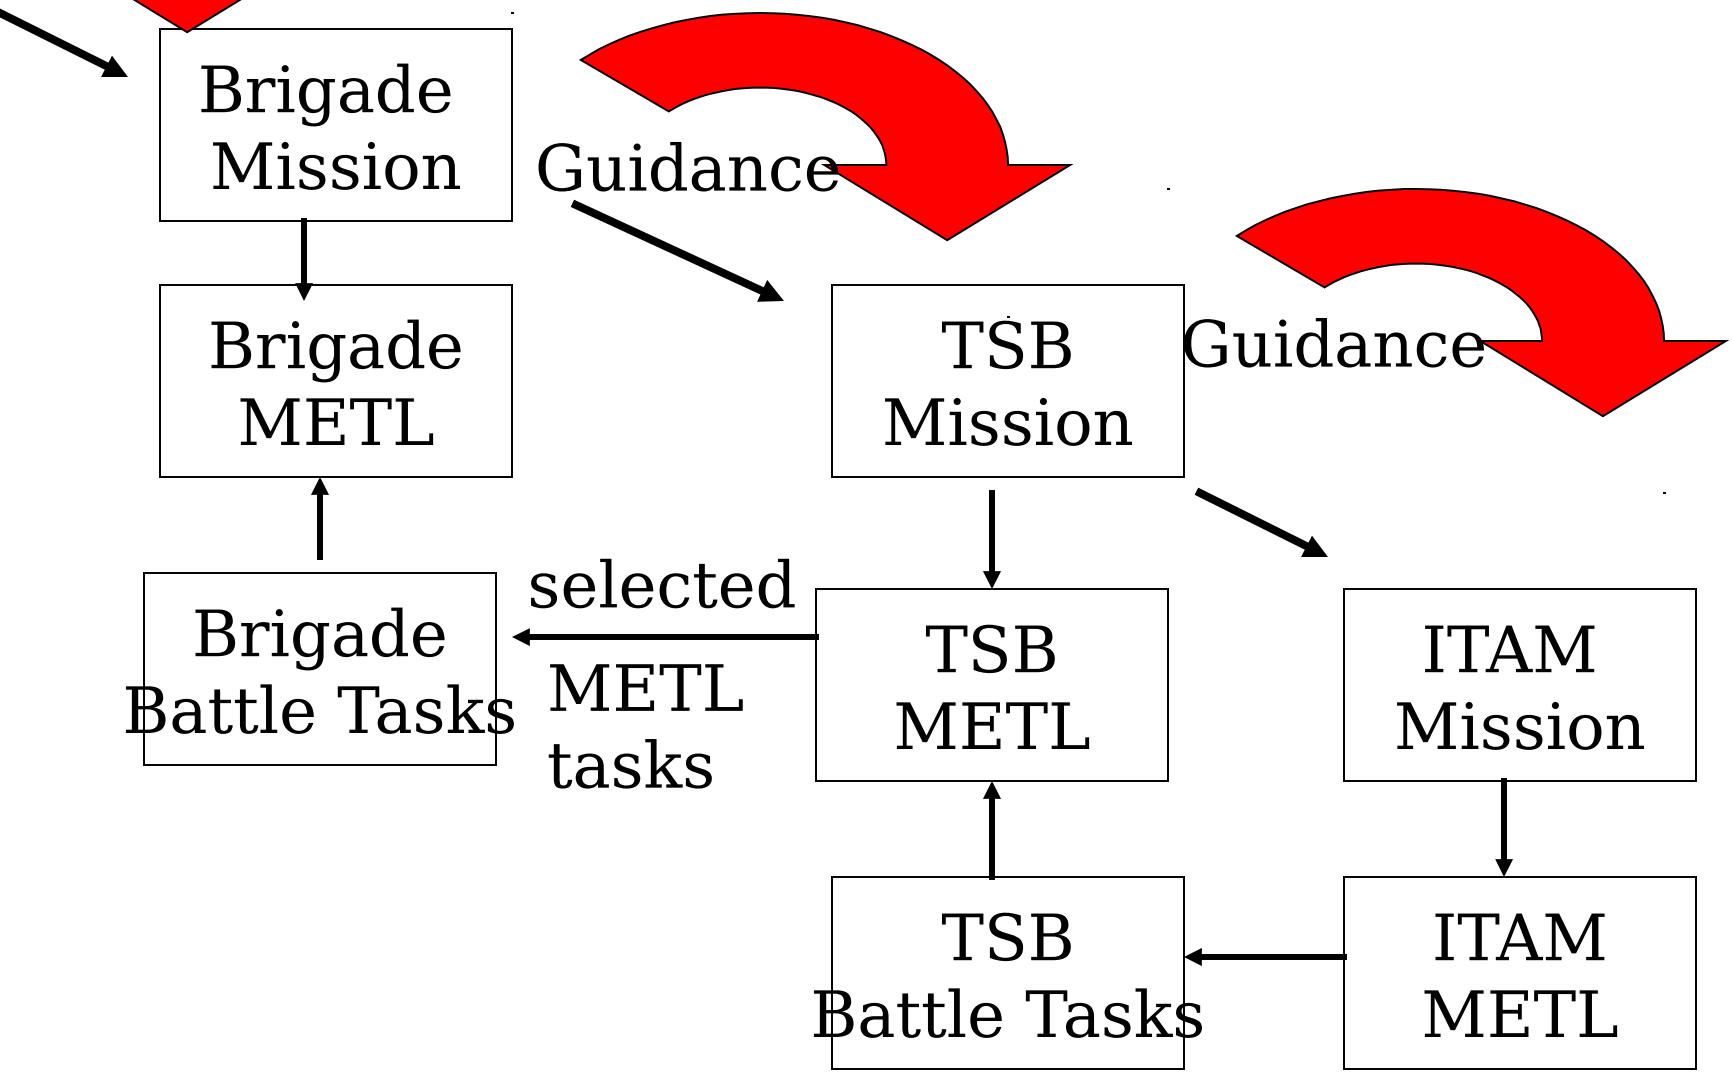
PURPOSE

- To provide ITAM Coordinators with an understanding of how to integrate ITAM in the Army Training Management Doctrine (FM 25-100/101)

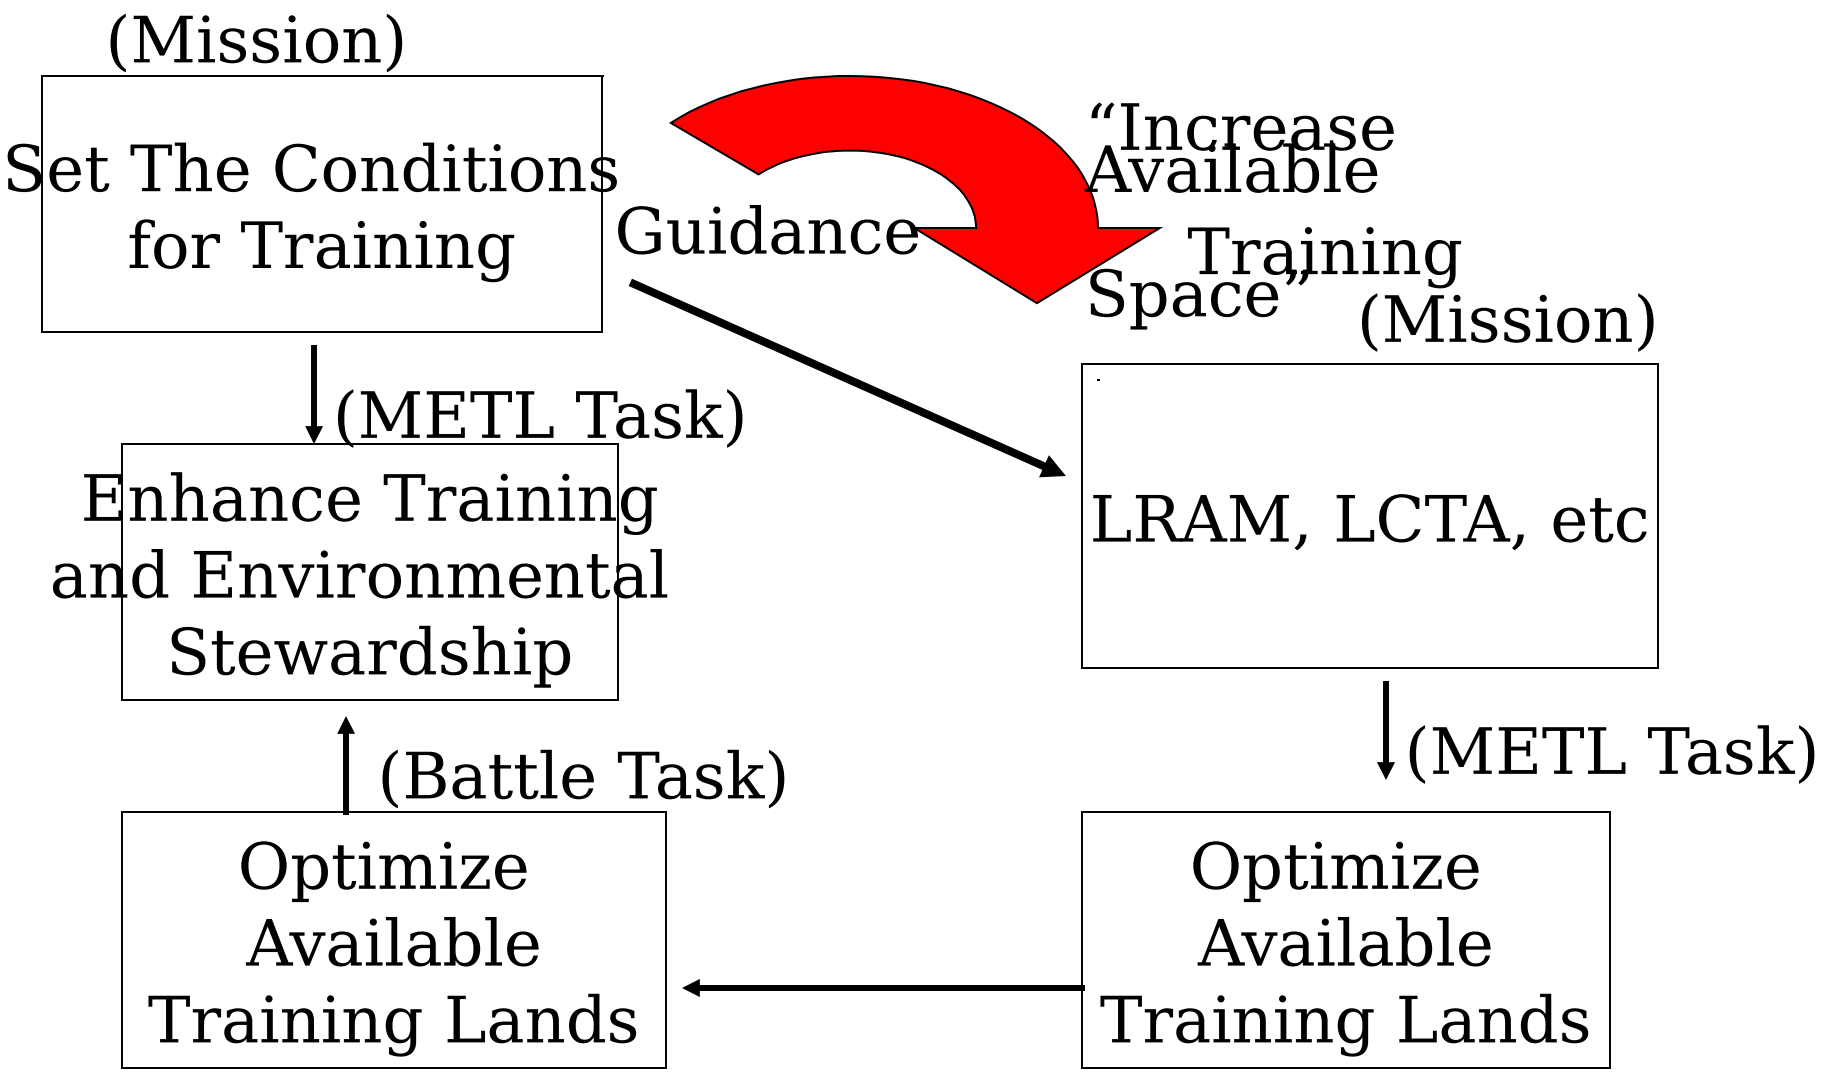
"TRAINING THE FORCE"

- Recognizes you can't do everything
- Focus on key tasks, Mission Essential Tasks List (METL)—no more than about five
- Tasks are linked with higher and lower units and are 'permanent'
- Tasks are assessed against specified standards
- Training management links long range calendar to the date of execution
- Process starts with guidance and ends with calendar

METL and BATTLE TASKS



METL and BATTLE TASKS



ITAM METL EXAMPLE

- Don’t use LCTA, LRAM, etc.
  - Relate it a training commander’s requirements
- Assess ability to achieve the standard
  - (T) Trained—successfully perform task to standard
  - (P) Needs Practice—Perform task with some shortcomings, not enough for complete retraining
  - (U) Untrained—Requires significant resources and training strategy to train to standard
- Strategy is what you specifically plan to do to improve or maintain that task
- Every task has conditions and standards

Summary

"Set conditions for training while being a model environmental steward in the Ozarks"

"Set the Conditions for BT while being a Steward of the Env"

"Enhance training while being a Steward of the Env"

"Optimize Available Training Lands"
